

“Shodh” MSFDA Action Research Project

- Embrace an immersive experience of capacity building program through “learning by doing”.
- Strengthen your professional ability and sensibility
- Contribute to the quality enhancement of MSFDA programs

Sounds Exciting? Here is the good news.

MSFDA invites individuals, group of like-minded researchers and/or institutions to take up action-oriented research on selected MSFDA programs

Action Research

This is an exercise intended to take a critical look at the selected MSFDA programs from all angles. It is an interactive inquiry process that includes observations, interaction with stakeholders, discussions and analysis leading to a contextual understanding of the program. It will help to identify critical aspects that may be specific to the region, institution for possible intervention in the program.

Eligibility

- Minimum 5 years of work experience
- Master's degree in any discipline; candidates pursuing doctoral research may also apply
- Conversant with social science research methodologies
- Proficiency in Marathi and English
- Age below 45* years; (*MSFDA reserves the right to relax age limit in case of exceptionally outstanding proposals)

Methodology

- Engage with the core team coordinating the program at MSFDA along with partner organization, participants, resource persons and other stakeholders.
- Initiate the cyclical process of Observe - Analyze - Execute - Observe - Report.
